Early Years Vision

Hareside Primary School

Our Core Commitments

To provide purposeful, hands-on learning that sparks curiosity and encourages active exploration.

Our environment nurtures deep learning through investigation and meaningful experiences.

Children think independently, solve problems, and reflect on their learning journey.

They're empowered to explore ideas, innovate, and take creative risks.

We guide children to think critically, weigh risks and act wisely.

They develop resilience and embrace challenges with confidence and determination.

Our children believe in themselves and think for themselves.

Our Approach to Play, Learning, and Growth

At Hareside, we define play as a rich and meaningful way of learning - where children explore, experiment, take risks, and make decisions. Our provision is shaped around purposeful experiences that spark curiosity and open doors to discovery.

Our engaging environment inspires children to investigate and think deeply, while we stay responsive to their interests and ideas. With a thoughtful balance of adult support and child-led inquiry, each day is full of learning opportunities tailored to our children's needs.

Children are nurtured to assess risks, persevere through challenges, and grow from mistakes. By building confidence and resilience in these early years, we prepare them for a successful transition into Year 1 and beyond.

We believe learning can happen anywhere and with anything, when the conditions are right. Our adults are active partners in every moment of play and conversation, ensuring that all interactions lead to meaningful learning that supports each child's unique journey.
